# High colour production values without the cost

In this economic climate, you need innovative technology that helps you reduce operation costs and boost performance even more than ever. Ricoh's Pro™ C5100S series light production printer helps you do just that.

High image quality and broad paper handling lets you extend your existing offering, or promote in-house printing, to increase both revenue and profits.

- Extremely high image quality
- Broad media support
- Easy to use design
- Maximum uptime
- Small footprint

## Enhanced technology. Versatile performance.

### High image quality

This new generation digital printer offers outstanding colour output so you can cut time and costs on light print runs. The latest VCSEL technology and new toner formulation ensure supreme image quality for professional results.

### Broad paper handling

With enhanced paper handling capability, this printer will support heavy coated as well as textured media and up to SRA3 paper size. It enables you to increase your productivity and capture more jobs such as business cards and invitation cards for example.

### Ease of use for everyone with simple operation

New large separated operational panel with customisable home screen allows programme short cuts to be set for frequently used job operations. Includes Status Light Pole so you can monitor operation from a distance and 'on the fly' toner replacement to maximise uptime and productivity.

### The perfect fit

With its smaller footprint, the PRO C5100S series needs limited installation space. So it can fit more easily into your workspace whilst it offers you the versatility and performance of larger and more expensive printers.

# Designed to maximise your success

## High productivity

- Runs at up to 80 pages per minute in B/W and colour
- Paper handling and print quality is improved by advance toner transfer technology and elastic fusing belt
- Delivers high productivity in low volume runs helping you meet tight delivery schedules

## The latest laser technology

Our innovative VCSEL technology gives best in class resolution of up to 4800 dpi creating outstanding image quality. VCSEL has as many as 40 laser beams emitting simultaneously to give exceptionally accurate and smooth, professional image quality.

## Usability

- Designed to maximise uptime and ensure simple troubleshooting processes
- Status Light Pole – can see operational status even from a distance
- Operation panel features animations for user ease
- 'On the Fly' toner bottle replacement enables continuous usage

# Extends your capabilities

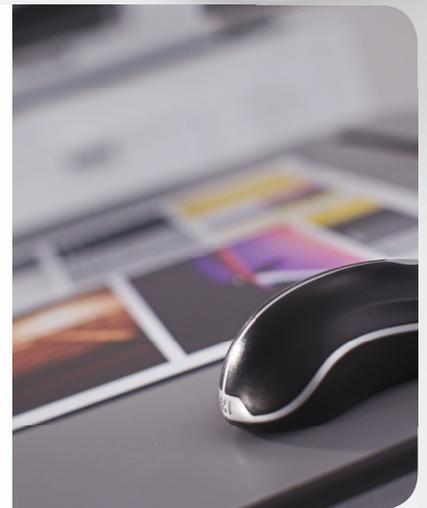

## Controller Choice

The Pro™ C5100S series supports two types of EFI™ Fiery servers that incorporate the latest FS100 Fiery Platform. The EFI Fiery Embedded server, E-22B, integrates seamlessly and helps simplify job and colour management. The EFI Fiery External server, E-42B, incorporates the features of the other server and delivers higher performance.

## Improve your RIP productivity

The E-22B incorporates a high-performance 2.9 GHz Intel processor, 2GB memory and an impressive 500 GB HDD. The E-42B with its extended 4GB memory and a powerful 1TB HDD, delivers even greater robust functionality. These outstanding options will improve productivity of complex print jobs and support finishing options to suit your requirements and broaden your client offering.

## Broad paper support

The Pro™ C5100S series gives your business more print opportunities to offer your customers and grow market share.

- Higher printing performance on heavy media - textured and coated - for business cards, post cards, invitation cards, brochures, manuals and more
- Supports 52-256 gsm in duplex mode
- Fusing nip width can be optimised for improved envelope printing

# Optimises your environment

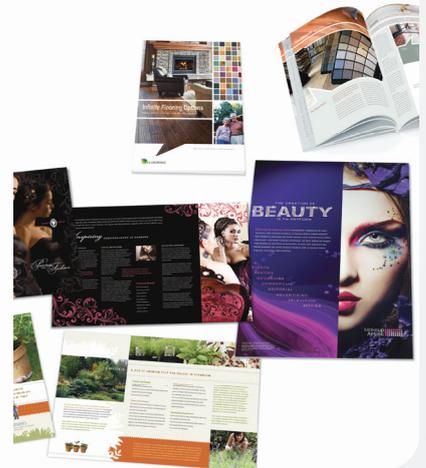

## Maximises uptime

- Paper weight detection prevents mismatching of paper weight to setting which could cause incomplete fusing or downtime
- Multi-feeding detection avoids misfeeds of pre-printed paper – so print quality is assured and problems avoided
- Status Light Pole allow operation to be monitored from a distance
- Operation panel features animations that easily guide the user through the clearance process should a jam occur

## Enhanced Paper library

The extensive library holds over 200 profiles tested and proven by Ricoh. There's also a custom library for personalised media profiles along with a back-up capacity for an additional 1,000 profiles. It gives real scope to take advantage of a diverse range of different print opportunities.

## Energy saving

- New recovery methods from energy save mode reduce power consumption
- Power On/Off timer reduces TCO and energy costs
- Both Energy Star and BAM compliant
